**RE: Letter of support
Bridge Builders Microgrants Program**

Beth Brilinski,

The City would like to welcome your business to the City of Bad Axe. We hope you find all the resources you need to thrive.

A localized project similar to "The Sketchbook Project" sounds interesting and a fun way to bring people together. This project sounds like it has the potential to engage all age groups with topics either focused on an age group or as projects that bridge the generational gap.

If you have not already met some of the other local business owners and community organization leaders, I would be honored to make introductions for you. I can see how your project could be a part of community events that would help to promote your business and improve community events.

In regards to your requested letter of support for the Bridge Builders Microgrant Program sponsored by the Michigan Municipal League, The City offers their full support for your project, your grant application, and wish you nothing but success.

If you have any questions, please contact the undersigned at 989-269-7681.

Respectfully:
City of Bad Axe

Robert Stiverson, PE
City Manager
